At temperatures of from -183° to +100° platinum ex-
 hibits no catalytic effect on the adsorption of hydrogen
 on charcoal. The difference at these temperatures be-
 tween the adsorption on platinized and nonplatinized
 charcoal is attributed to the adsorption of hydrogen on
 the platinum, and is proportional to the platinum con-
 tent. At temperatures between 300° and 800° the quan-
 tity of hydrogen adsorbed on the charcoal increases with
